Comments for Chapter/Topic: Transportation

I have major concerns over the possible plans for downtown traffic.

- The paired one-way suggestions would destroy the wonderful older neighborhoods in our city. This would drive away many of the great people who reside in Verona
- The round-about alternative is also not appealing. Many people are confused while driving in this type of intersection & it is not pedestrian friendly.
- I am not certain if large parking lots or parking garages in downtown are good for our city either. This would also destroy some of our great older neighborhoods.

Comments for Chapter/Topic:

- I would like to see more preservation of our older neighborhoods & buildings.
- The paired one way would also be a burden to the current downtown businesses that rely on two way traffic.
- The "do nothing" approach appeals to me as well as restructuring the Main Street/Verona Ave traffic lights.
- A more compact downtown would be more appealing than a spread out downtown that encroaches on the nearby neighborhoods.

Comments for Chapter/Topic:

If you wish to directly receive notices of future events, please provide your e-mail below:

- Please keep the streets of Franklin & Schuman residential areas where people can enjoy low traffic streets, raise their kids, enjoy their front yards or retire in peace.

over →

I do like the idea of limiting parking on Main Street during peak travel times & allowing for additional lanes of traffic during the AM & PM commutes. The idea of moving the bike lanes to Franklin or Shuman seems like a good plan as well.

Comments for Chapter/Topic: Transportation

What happens when 2 lanes each way is not enough? If the city keeps growing, and more people are traveling through, 2 lanes will need to become 3 - and there isn't room for that.

Where are people going? If they're going into Verona, the traffic won't dissapate - if they're cutting through, give people an alternative; expand off the bipass north, or give a high-speed road outside of downtown to get people out of the city.

The congestion on main street @ this time is very limited and doesn't garner a grave reaction. I believe we could slow down traffic on main street via more stop signs &/or lights and that would provide for more pedestrian friendly crossings. Why not keep downtown more accessible to people who live & shop here not people driving through. Williamson street is an interesting model. They (Madison) have protected neighborhoods, slowed traffic and businesses are prospering.

We cannot stop traffic to & from the schools @ peak times but slowing the vehicles down will be safer for all.

Comments for Chapter/Topic: Transportation

- Paired One Ways would destroy the residential areas of the downtown. Pedestrians are already at a disadvantage crossing the Main St. area and diverting the flow of traffic thru residential areas would cause additional problems. We moved in an older part of Verona [redacted] (Jefferson St.) and we moved here because of the quiet older neighborhood. I also commute to West Madison for work and the minor traffic

Comments for Chapter/Topic:

slowdown is not as major as people tend to create it as being. By merely widening Main and having no parking during Rush Hour we would eleveate the minor slowdowns.

Comments for Chapter/Topic:

If you wish to directly receive notices of future events, please provide your e-mail below:

Comments for Chapter/Topic: Paired One Ways

Not a good choice w/ all the residential units. Please respect the people who chose to live within walking distance and patronize the area businesses. We as residents are an important part of the "downtown" as the consumer and making the road in front of our houses a main highway will surely drive a large portion of people away.

Comments for Chapter/Topic: Intersection / Traffic

I believe a roundabout isn't pedestrian friendly. Also, I think they are a good choice for less busy intersections, but not for larger. Also, if you want to promote business downtown, why would you implement a plan that drives a business away? (Mobil)

My suggestion is to widen and have more lanes. - possibly make it so there is no parking during peak hours to allow use of the lane - similar to Monroe St.

Comments for Chapter/Topic: Dawtown / Commercial -

leave young on Franklin alone - I believe it's already mixed (??) so why change nice houses to commercial only? I believe Verona will never have a viable downtown due to the closeness to Madison. Let's concentrate on improving the traffic flow (I like the alley parking idea) and filling the existing buildings with businesses. With Farm + Fleet and the West End project, I believe people will flock to those areas and not downtown.

If you wish to directly receive notices of future events, please provide your e-mail below:

_____

Comments for Chapter/Topic: Transportation Plan

I think the transportation plans are attempting to solve a problem that does not truly exist. Verona does not have a traffic congestion problem. Yes, there is mildly heavy traffic early in the day and in evening. However, this only amounts to approximately 1½ hours of the entire day. Even at the busiest times it only takes 5-10 minutes to cross from one end of verona to the other via main st. I do not see a point in spending tens of millions of dollars to correct a minor inconvenience.

Comments for Chapter/Topic: Agriculture, Natural + Cultural Resources

I applaud consideration of farmland preservation. But I see no thought beyond the basics of long-range planning with respect to natural resources and environmental impact. One year ago there were six eco-municipalities in Wisconsin, today there are 29. Ecomunicipalities not only must change energy use consideration but also, land use decisions on sustainable communities.

Comments for Chapter/Topic: Land Use & Housing

Comprehensive Plan survey #1 indicates a desire to limit both single + multifamily housing development and a significant interest in larger parcels. The latter idea is incongruous. We need higher density housing to reduce consumption of land for housing. The "old fashion" neighborhood concept adopted by Middleton in some areas of recent development demonstrates the potential.

Comments for Chapter/Topic: Economic Development and Transportation

Plan Commission approval of the Farm + Fleet Development and the west end places high acreage under roof and asphalt and attracts major traffic into the City. I am concerned about the impact of that traffic on demand for transportation redevelopment. I recall the pre-bypass congestion and am not convinced of the benefits of approving two or maybe three big box shopping centers. I also grew up in a City that saw its downtown destroyed by a single shopping mall. That city has not recovered in 40 years.

If you wish to directly receive notices of future events, please provide your e-mail below:

I don't believe that high-volume traffic arteries are compatible with retail businesses. We need a north/south bypass or multiple north/south routes thru the city to lessen the load on Main St.

Or - this is a brainstorm - make Main + Verona arteries and face the retail businesses on the side streets.

Comments for Chapter/Topic: Perimeter Area Land Use Plan

I strongly favor preservation of Agricultural zoning in "North" region (currently Town of Verona, South of PD) to maintain buffer between Madison and Verona.

Comments for Chapter/Topic: Downtown traffic routing

Discourage paired one-way routing;
Not in favor of roundabout due to lack of pedestrian-friendliness!
I prefer the signal intersection or a "no change" option for Main Street / Verona Ave intersection

Comments for Chapter/Topic: _____

If you wish to directly receive notices of future events, please provide your e-mail below:

jamie.l.barger@gmail.com

16

Comments for Chapter/Topic: Transportation

Roundabout seems the best solution for downtown traffic congestion. ~~We are against the paired one-way plans.~~ We like the Roundabout over the ~~set~~ signalized intersection - better way for the traffic to flow. The paired one-way is easier for pedestrians, I'd prefer to not add more commercial to that plan!

Comments for Chapter/Topic: Ag, Natural & Cultural Resources

More parks and greenspaces! A weekly farmer's Market downtown by the bike path would be nice, too.

Comments for Chapter/Topic: Downtown Land Use

We like: Pedestrian and bike friendly, local businesses (small business). It seems there is so much to rent downtown right now that has been empty for quite awhile, it doesn't make sense to convert more residential into commercial

Comments for Chapter/Topic: _____

I'm against changing Schuman + Franklin streets to one way or any other way. It seems unfair to do this to established neighborhoods. These streets are already dangerous enough. Even though posted at 25 traffic zooms through at a much higher rate of speed. I have small children & am always concerned about their safety.

Comments for Chapter/Topic: _____

I'm also against the round a bout idea. The volume of traffic is just too high. I don't believe it would ever flow smoothly + I believe it would increase the amount of accidents.
